FireZERO-T

An ultra-light automatic fire extinguisher that extinguishes fire by releasing fire extinguishing agents in a tube instantaneously when it reaches a specific temperature or flames

Applies to A, B and C fire types

Fire extinguishers suitable for distribution panels, Power Plants, charging stations, racks, controllers, etc

The size of the extinguishing tube is determined based on the volume of the container

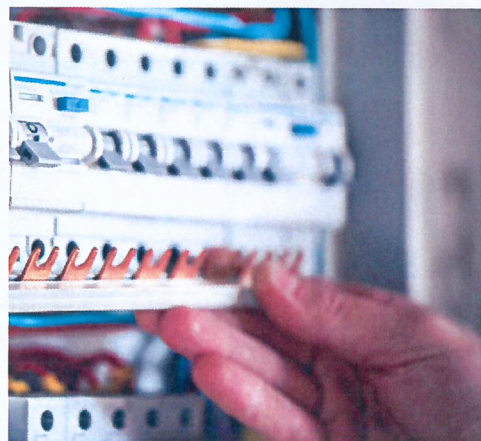

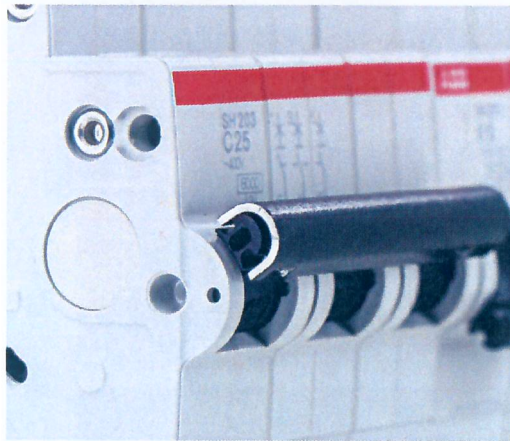

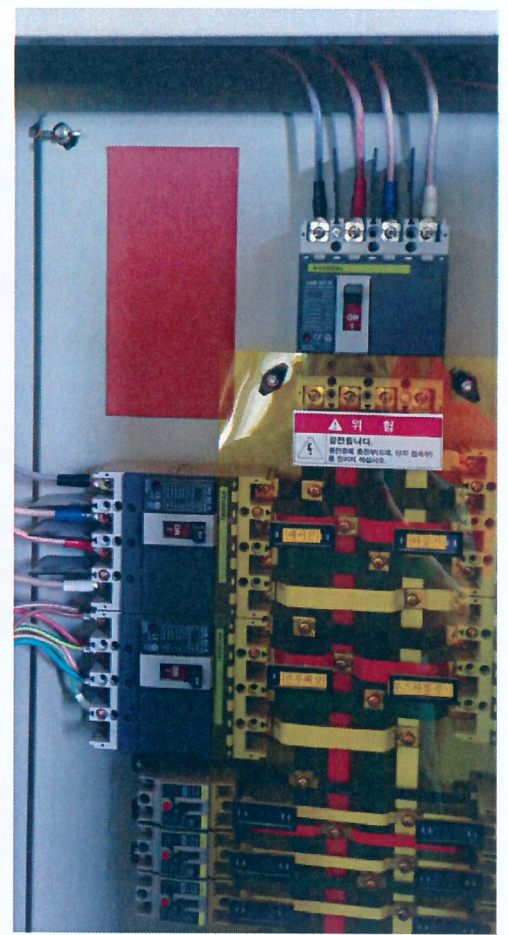

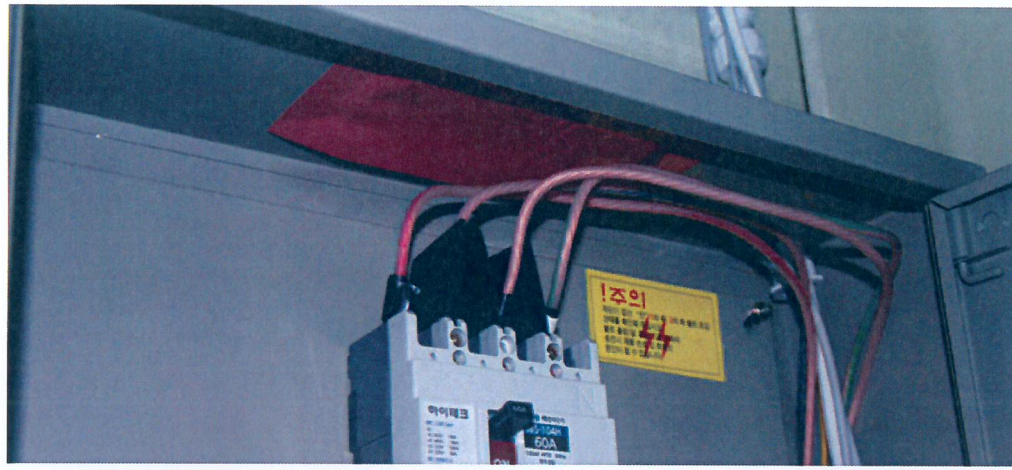

Monitoring condition when attached to sensor

- Fire extinguishing within a **second**
- **Power-free** heat-sensing tubes and fire extinguishing agents
- **Very easy** to set up
- Requires **no maintenance**
- **Eco-friendly** fire extinguishing agent, harmless to humans
- Leaves **no residue** after extinguishing a fire
- Lightweight with **low mechanical risk**
- **Affordable price**

Specification

Thickness	Length	Protective volume	Operating temp	Product weight	Extinguishing agents
16 ϕ ,12 ϕ ,8 ϕ	100mm~8000mm	0.02m ³ ~ 3m ³	(100 $^{\circ}$ c \pm 3 $^{\circ}$ c)	50g~2000g	FM200 or NOVEC1230

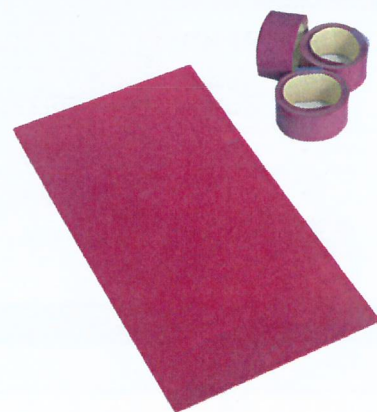

fireZERO - P

Microcapsules containing fire extinguishing agent operate automatically in the event of a fire, extinguishing the fire

Upon detecting a rise in temperature, an automatic fire extinguishing agent is sprayed.
Suitable for Class A, B, and C fires, this fire extinguisher is designed for use in small spaces.

- **Powerless** heat-sensing pads
- **Quick** extinguishing in seconds
- **No residue** after fire extinguishing
- Easy to **set up**
- **Eco-friendly** fire extinguishing agent, **harmless** to humans
- **Lightweight** and **low-priced**

Specification

Product Size	Protective volume	Operating temp	Extinguishing agent
200 * 100 * 2 (mm)	0.01 ~ 0.06 (m ³)	120 (°C)	NOVEC1230

FireZERO-K

A passive fire extinguisher designed to contain a suitable fire extinguishing agent for cooking oil fires, effectively suppressing the fire by cooling

A fire extinguisher designed for use in cooking oil fires, suitable for anyone to use.

- Cooking oil fire only
- Power-free
- Quick extinguishing in 10 seconds
- Eco-friendly fire extinguishing agent, harmless to humans
- Semi-permanent use
- Easy for everyone to use
- Low price

Specification

Product Size	Protective volume	Volume of agent	Product weight
100 * 150 (mm)	0 ~ 2.0 (L)	170 (ml)	185 (g)

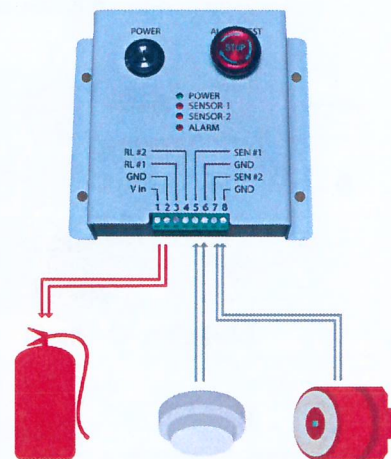

FireZERO-A

An automatic fire extinguishing system that operates by connecting a cylinder filled with a fire extinguishing agent to a nozzle, triggered by a fire detection signal (such as fireworks, temperature, smoke, heat detection line, etc.)

Automatic fire extinguishers installed in large transport vehicles and large kitchens to rapidly extinguish fires during operation.

- Apply **various** fire detection sensors
- **Emergency** button included
- Check the status of the **sensor**
- **Quick** extinguishing in seconds
- Operates **using DC12V**
- Various agent are **available**
- Easy to install
- **Few errors** and **easy maintenance**
- **Low price**

Fire extinguisher activation

Fire / Flame detection

Specification

Product Size	Power used	Out put signal	Status indication	Remark
110 * 115 * 45 (mm)	DC12V	DC12V, Solid state	Power,sensor status, alarms, etc	Application of various fire detection sensors

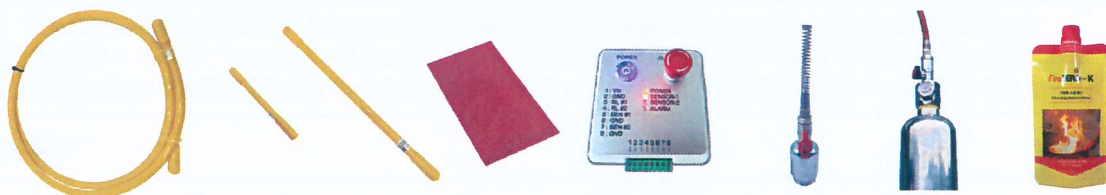

CUSTOMERS

INTERNATIONAL NETWORK

OUR PRODUCTS

The information of the product may be changed without prior notice

As an expert company in next generation platforms for fire-extinguishment and safety, we pursue safety and convenience.

History

Since our establishment in 1996, we have maintained our research work on security equipment and safe firefighting systems.

Security

- RFID Reader
- Smart card issuance system
- Palm vein recognition system
- Digital door lock
- Access control system

Firefighting

- a tube fire extinguisher
- a pad-type fire extinguisher
- a cylindrical fire extinguisher
- a kitchen fire extinguisher
- Multi-measurement thermometer
- an automatic fire extinguisher for a vehicle

Patents (more than 10)

- CE
- KFI
- Design registration
- various test reports
- Test report from China Fire Department and other countries
