A Possibility for Everyone's Beauty

biopeXFill®

Established in 2020, Glopex Co., Ltd is fast growing in the global health and aesthetic markets, aiming to be a developer and manufacturer of biomedical and biopharmaceutical products. Glopex®'s main business area focuses on the biomedical field to improve overall health, life, and beauty.

With continuous in-house research and development, we strive to develop various advanced products, including HA fillers, skin boosters, botulinum toxins, and other aesthetic products with our exclusive technologies.

Glopex® has innovated its biopeXFill® HA gel lines, featuring a variety of injectable cross-linked hyaluronic acid gels in 1mL and 10mL syringes, as well as 60mL vials with distinctive applications for the body. These products come in various formulations and densities, contributing to increased volume and fullness of the skin

biopeXfill® is a distinctive performance hyaluronic acid gel, showing the most natural and satisfactory results.

Glopex® distinguishes itself with exceptional customer service, providing exclusive benefits and rewards to members of the biopeXFill® club.

biopeXFill® 1mL line

biopeXFill® is Glopex®'s first line of HA gels consisting of biopeXFill® FINE, biopeXFill® DEEP, biopeXFill® SUB-Q and biopeXFill® ULTIMATE. We offer four distinct viscoelasticity products for customized wrinkle correction and contouring treatments.

biopeXFill®

biopeXFill® 60mL

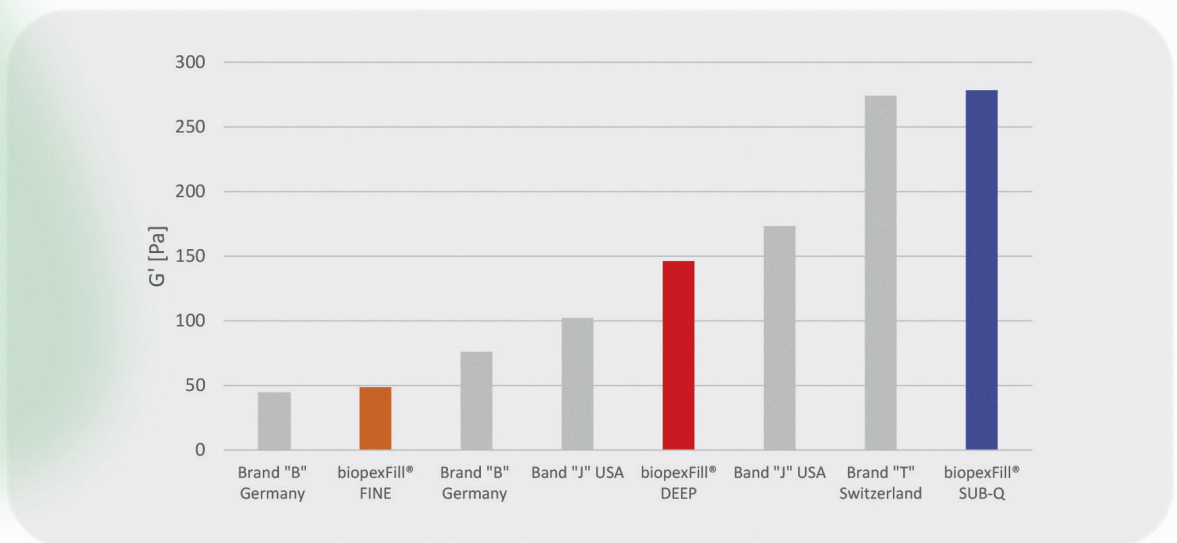

The "BODY-V60" is a unique 60mL HA gel designed to enhance the desirable appearance of breasts, legs, and buttocks. Lidocaine-free, it is suitable for body injections requiring larger volumes of HA gel.

High-Density Hyaluronic Acid Gel

biopexFill® is manufactured of high-density Hyaluronic Acid gel using unique cross-linking technology to create a higher viscoelasticity gel that is safe to use.

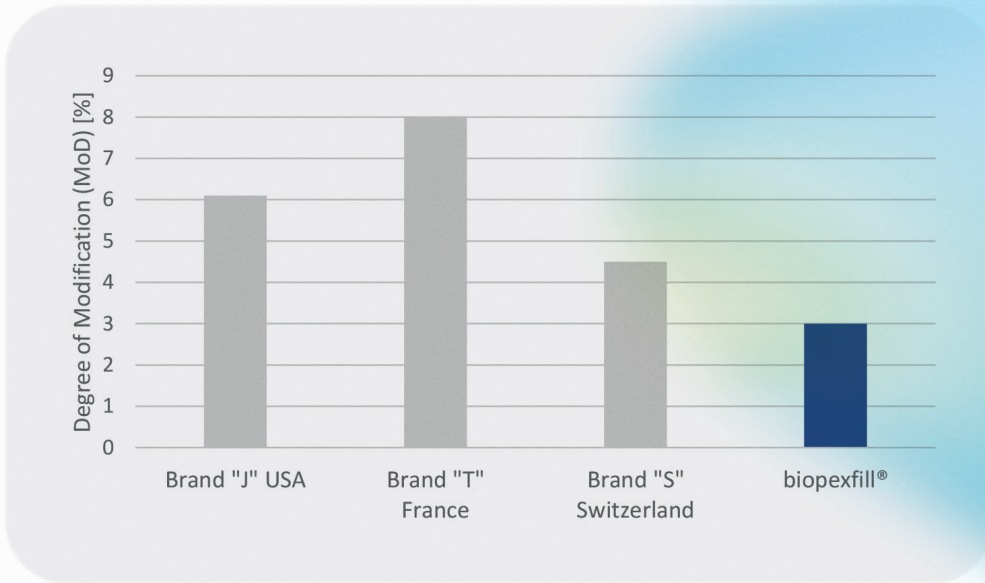

Advantage of biopexFill® products rheological versatility

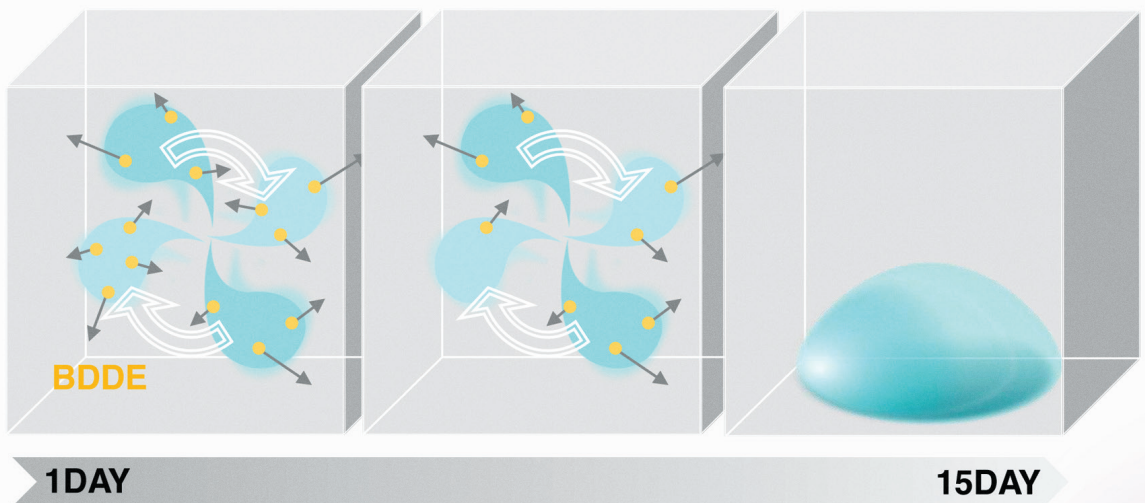

biopexFill® products provide a various selection of hyaluronic acid fillers, ensuring predictable and natural results to meet the individual

biopexFill® Safety & Purification

- **Modification Degree (MoD)**

A lower Modification Degree makes it more similar to the natural properties of hyaluronic acid, ensuring a safer gel. biopexFill® has a low MoD, providing safety with confidence.

- **Removal of Residual BDDE**

biopexFill® refinement method minimizes the residual BDDE through a two-week purification process to improve the product's safety.

1.0 mL Line

FINE / DEEP / SUB-Q / ULTIMATE

biopexFill® FINE offers the smoothest viscoelasticity, ideal for fine wrinkle treatments like forehead lines and neck wrinkles, as well as soft lip-line treatments.

biopexFill® DEEP is suitable for immediate correction of deep wrinkles, marionette lines, cheeks, chin, temple, lip contour, and scar treatment.

biopexFill® SUB-Q, with high gel density, is best for restoring fullness in nasolabial folds, jawline, facial contour, and nose, enhancing facial profile shape and definition.

biopexFill® ULTIMATE, the firmest with the highest viscoelasticity, provides immediate effects for facial contour correction, volumization, and is designed for treatments like chin augmentation and jawline enhancement.

biopex Fill®

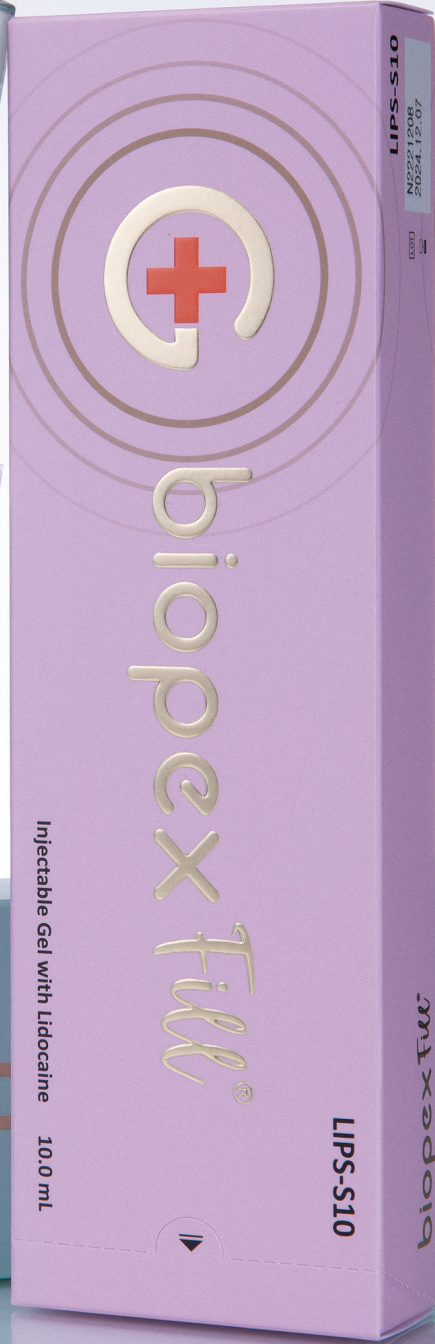

10mL Line LIPS-S10 / FACE-S10

biopexFill® LIPS-S10 is a product specialized for lip treatments with a soft viscoelasticity. It is suitable not only for lip line treatments and lip augmentation but also for cheek augmentation and temple.

biopexFill® FACE-S10 is optimized for facial contouring and augmentation, featuring a high-viscoelasticity gel. This characteristic makes it effective for filling wrinkles such as nasolabial fold, marionette lines, and nose shaping.

biopex Fill[®]

60mL Line BODY-V60

biopexFill® BODY-V60 can be the perfect option for restoring volume in areas of significant volume loss, such as the breasts, lower legs, buttocks, hip dips, and genital areas. Additionally, it is an effective product for hand rejuvenation and cellulite reduction.
