# INTRARICH patch specifications

## High efficiency and duration of the patch action

- ♦ The deep penetration of the synovial fluid with improved formula
- ♦ High drug concentrations
- ♦ The duration of action

## Easy to apply

- ♦ Adheres well to the skin
- ♦ Easily removed
- ♦ Not susceptible to deformation

## Flexible, soft material

- ♦ Tightly sealed joint
- ♦ Easily take the desired shape
- ♦ Keeps long time

## Low probability of adverse effects

- ♦ No gastric irritation
- ♦ Minor skin irritation

## Воздухопроницаемость и гигроскопичность

- ♦ High moisture and air permeability
- ♦ The polymeric material can absorb moisture

# INTRARICH patches advantages

- ✓ The efficacy and duration of action of the patch due to the high concentration of the components and their deep penetration;
- ✓ No adverse effects on the skin and the gastrointestinal tract;
- ✓ Elastic and soft material tightly fits, easily taking the desired shape, long kept and painlessly removed;
- ✓ High moisture and air permeability;
- ✓ Not stain clothes, unlike creams / gels;
- ✓ Retains therapeutic properties up to 10 hours on pain points;
- ✓ The presence of the plastic lock on the package, not dry after opening;
- ✓ There is no strong smell;
- ✓ The effect is gradual, not "burns" the skin;
- ✓ Hypoallergenic, gentle adhesive composition.

## *Disadvantages competitors patches (Salonpas patch, Salonsip patch, Extraplast «Pepper», Extraplast cooling patch)*

- ✓ Short-term and inefficiency;
- ✓ Adverse, irritating to the skin;
- ✓ Incomplete adhesion;
- ✓ Painful removal;
- ✓ Lack of moisture and air permeability from the use of Non-woven basis;
- ✓ The pungent smell.
